

Robots serving beer, bourbon and wine!?

Robots are quickly becoming less science fiction and more real as they're quickly making their way into the real world.

In fact, the [world's first robot hotel](#)

just recently opened in Japan that is completely staffed with nothing but robots. [robot-server.jpg](#)

Rosie, the personal robot in the old cartoon "The Jetson's", just wasn't so far fetched after all!

Recently, some of the Hilton hotels have begun using robots to assist their guest with concierge services. [robots ? Hilton's website.](#)

Also, Pizza giant Domino's has unveiled an autonomous pizza delivery robot DRU (

[Domino's Robotic Unit](#)

) that is being trialled in New Zealand. DRU is the first-ever automated pizza delivery bot that brings you your pizza directly to your door.

As a result of these advances in technology, the use of robots in the service industry is becoming increasingly common.

These robots and many other questions will need to be tackled in the near future.

In any event, the use of robots in the service industry has proven to be a very successful and profitable business model.

Some professionals in the service industry are concerned that the use of robots will lead to job loss.

However, just think how cool it'd be to have a robot deliver your favorite nightcap directly to your hotel room.

Plus, folks who enjoy a fine glass of whiskey or a delicious microbrew from time to time, also appreciate

So, the questions we should really be asking here are:

Will these robots be serving us our favorite beer in style? Using one of Barrel-art's stylish beer flights made from reclaimed wine barrels?

Or...

Will they serve us our favorite glass of whiskey using one of Barrel-art's classic [5 shot glass holders](#)? Also, made from reclaimed barrels previously used to age bourbon in.

The bottom line is, we didn't shy away from the thought of making these

This debut about high-tech virtual reality has been going on for years

And just like the adoption of making these

Either way, please be sure to request that these robots serve your favorite beer or whiskey in style! Either [classic beer flight](#) or a stylish [5 shot glass holders](#)!
